Aims/Learning Outcomes and Delivery	Autism Spectrum Disorder (ASD) is a condition that affects verbal and nonverbal communication, social skills, and behaviour. This course will enable participants to obtain detailed information on ASD. Participants will learn how to understand and interact with individuals with this condition. It should appeal to parents, educators, and other professionals and employers who would like to better their knowledge on ASD. Learning Outcomes • To obtain a general view of ASD. To understand the why's and how's of ASD. • To examine the communication style of individuals with ASD. • To learn how to manage different and challenging behaviours. • To be around to help individuals with ASD to understand the social world and to be able to interact in it. • To learn how to produce and use a variety of aids that will help individuals with ASD. • How to work with individuals with ASD in the school and work environment to enable the individuals with ASD to perform to the best of their ability. Delivery Style: The course will be delivered through a series of lectures with opportunities for discussion.
Who should attend	This course is open to the general public.
